DETAILED ACTION

This is a response to the amendment filed 9/14/2004. Claims 1-17 are under examination. The rejection of claims 3, 5, 8-9 and 14-17 under 35USC 112, second paragraph has been withdrawn in view of the amendment.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Vangal (USP 6,535,045), prior art of record. Figure 5 of Vangal shows data buffer (102, 106, 110) comprising a rising edge device (120, 140, 130) having a trigger circuit (120) and a plurality of rising edge circuits (140, 130), a falling edge device (122, 142, 132) having a trigger circuit (122), a plurality of falling edge circuits (142, 132), wherein said buffer circuit Vangal is capable of extending a timing margin thereof for sampling correct data as called for in claim 1.

Allowable Subject Matter

3. Claims 2-17 are presently allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: the Vangal reference fails to teach or fairly suggest said trigger circuit of said rising edge device comprises a ring counter for receiving a clock signal and counting in response to said clock signal so as to generate a first rising flag signal and a second rising flag signal as called for in claim 2, , said trigger circuit so said falling edge device comprises a ring counter receiving a

clock signal and counting in response to said clock signal , so as to generate a first falling flag signal and as second falling flag signal as called for in claim 4, ring counter, operative for generating a rising flag signal for data sampling, said plurality of flip flops are clocked by and AND operation output as called for in claim 11, falling edge circuit clock by an OR operation output, provided by an OR gate of said clock signal and said falling flag signal as called for in claim 14.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
